PROFESSIONAL SUMMARY

Full Stack and Cloud Software Developer with experience in scalable architectures, serverless solutions, and cloud infrastructure on AWS. Proficient in Python, Node.js, and TypeScript ecosystems for building RESTful APIs and distributed applications. Led the implementation of secure authentication integrations, orchestration of automated CI/CD pipelines, and resolution of infrastructure and performance incidents in production environments.

Key Technologies: Python, TypeScript, Node.js, Next.js, AWS (Lambda, API Gateway, Cognito, CloudFront), Docker, Terraform, PostgreSQL.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Fundação Cearense de Pesquisa e Cultura

10/2021 - Present

- Architected and developed serverless backend services in Python (AWS Lambda and API Gateway), orchestrating high-scale IoT telemetry ingestion (LoRaWAN, NB-IoT).
- Optimized platform security and access control architecture, implementing AWS Cognito for user federation and applying protection policies via AWS WAF against attacks and abuse.
- Implemented Infrastructure as Code (IaC) using Terraform and Serverless Framework, setting up secure proxies with CloudFront and Lambda@Edge for JWT validation and automated credential management.
- Led the investigation and mitigation of production incidents, resolving critical failures and establishing rapid response runbooks.
- Automated continuous integration and delivery (CI/CD) pipelines using GitHub Actions and AWS CodePipeline, and remediated vulnerabilities reported in penetration testing audits.

PROJECTS

BSGame - Reading Gamification Ecosystem

01/2026 - Present

- Developed a distributed gamification ecosystem (PWA and Desktop) communicating with a central API, synchronizing physical bibliographic metadata via a desktop agent.
- **Technologies:** TypeScript, Next.js, Electron, PostgreSQL, Drizzle ORM, Zod, Vitest.

Recursofy (Bachelor's Thesis Project)

01/2025 - 12/2025

- Designed a SaaS platform for managing corporate and university resources, ensuring high scalability through Docker containers.
- **Technologies:** Node.js, Prisma, PostgreSQL, Docker, Firebase, and Telegram integrations.

EDUCATION

Bachelor of Science in Computer Science

Universidade Estadual do Piauí (UESPI) | 01/2020 - 03/2026

High School Diploma & Technical Degree in Information Technology

Colégio Técnico de Floriano (CTF/UFPI) | 01/2017 - 12/2019

SKILLS

- **Languages:** Python, TypeScript, JavaScript.
- **Frameworks & Libraries:** Node.js, React, Next.js.
- **Cloud & Infrastructure:** AWS (Lambda, API Gateway, Cognito, S3, CloudFront, DynamoDB, WAF), Terraform, Docker.
- **Databases:** PostgreSQL, DynamoDB, MongoDB.
- **Tools & Practices:** Git, GitHub Actions, CI/CD, Serverless, Microservices, TDD.
